

July 2011

For Immediate Release

***Precision Flow Technologies now offering patented process tool utility modules to complete its Total Molecule Delivery Solutions (TMDS) portfolio.***

**Saugerties, NY, - July 2011– Precision Flow Technologies (PFT),** Precision Flow Technologies (PFT) a global provider of outsource manufacturing, gas and chemical handling equipment, has now expanded its offering to include NEHP's modular process tool utility products. Operating under a strategic partnering arrangement, PFT will market, sell, and manufacture NEHP's patented products to compliment its portfolio of UHP gas and chemical handling equipment. The companies will also collaborate on certain projects that contribute value engineering and on-site support for end user facilities.

"NEHP's patented modular process tool utility solutions are the perfect fit to complete PFT's Total Molecule Delivery Systems (TMDS) portfolio." states Jim Rufe, Director of Marketing & Sales at PFT. "Adding to PFT's full line-up of process gas, chemical, slurry and metrology systems, NEHP's utility modules enable PFT to provide turnkey solutions from "Source to Chamber." Rufe added.

Russ Walton, President of NEHP states, "We are excited to partner with PFT to promote our modular utility products and collaborate on projects that leverage our expertise in facilities support equipment, our extensive product lines, and our capacity to support customers worldwide. Recently, with the support of NEHP, PFT was awarded a Hi-Flow Bulk Special Gas Delivery System (BSGS). This is a good example of our companies working together to meet a growing demand in the PV and LED marketplace."

"With common 3D CAD design tools and a line-up of products and services that complement each other, PFT and NEHP can provide value-engineered solutions tailored to meet customer specifications and budgets." Rufe states. "There is tremendous industry demand to lower costs of equipment and installation. PFT and NEHP understand these challenges, and we believe that our manufacturing capacity, our complete line of gas and chemical handling products, and NEHP's patented tool hook-up modules, contribute to help our customers lower not only cost of equipment, but also total cost of ownership."

Precision Flow Technologies (PFT) is a global provider outsource manufacturer of state-of-the-art process equipment for the world's leading semiconductor, photovoltaic, and LED equipment suppliers. PFT also offers ultra high purity specialty gas and chemical handling products, as well as measurement and metrology systems in support of the process critical applications.
