Precision Flow Technologies taps Mega Fluid Systems and Innovative Design Solutions to Expand its UHP Chemical Supply Equipment Offering

Saugerties, NY, - June 2011– Precision Flow Technologies, a global provider of design and manufacturing outsourcing solutions, has expanded its gas handling equipment product line to include a full range of UHP bulk chemical delivery equipment, slurry blend and dispense systems, chemical metrology, and SCADA.

Through strategic investment and technology licensing, PFT now manages Mega Fluid Systems (Tualatin, OR and Hsinchu, Taiwan), and Innovative Design Solutions (Milton, NY), two leading suppliers of UHP chemical & slurry supply equipment. PFT will leverage the synergies of the two companies to offer a comprehensive portfolio of branded products and contract manufacturing services to support semiconductor, solar, and LED customers. “Mega and IDS enable PFT to become a full service provider of gas and chemical delivery solutions for top tier customers around the world.” states Jim Rufe, Director of Marketing & Sales at PFT. “With a contract manufacturing backbone centered on process equipment, and with multiple manufacturing facilities in the U.S. and Asia, we are uniquely positioned to support large-scale turnkey projects with state-of-the-art gas and chemical delivery solutions to end users and to OEMs.” Rufe added.

PFT will manufacture gas and chemical products at its New York, Oregon, and Singapore facilities. Jack McCann, President of Mega Fluid Systems states, “We are pleased to become part of PFT’s Total Molecule Delivery Solutions strategy, and to offer PFT’s total capabilities to Mega’s worldwide customer base.” Donald Jackson Jr. of Innovative Design Solutions adds, “PFT’s infrastructure and product line is exactly what we have needed to promote our technology world-wide.”

Precision Flow Technologies (PFT) is a global outsource manufacturing provider of state of the art process equipment for the world's leading semiconductor, solar and LED production equipment suppliers. PFT also offers ultra high purity specialty gas and chemical handling products and measurement and metrology systems in support of these process critical applications.
